

ATTACHMENT 2

Lands Requiring Further Implementation Measures

The following lands require further implementation to eventually be protected lands within the Green Zone. In some cases the lands are already identified on Schedule 1 of Bylaw No. 3479, 2001, but do not have corresponding land use designations that would provide for adequate protection. In other cases the sites are neither protected through land use designation, nor identified in Schedule 1. In both instances, the City of Coquitlam will endeavour to work towards an appropriate approach for full Green Zone integration for the subject sites:

1. Consideration of a portion of the Stoney Creek Headwaters;
2. The Fraser River foreshore; and
3. A portion of lands along the Brunette River.
